Philadelphia, PA 19103-2029

II. FACILITY DESCRIPTION

Sunoco Partners Marketing & Terminals, LP's (Sunoco), Blawnox terminal is an aboveground bulk material storage tank distribution facility and pipeline breakout station for petroleum products, with an allowable terminal throughput of 246,000,000 gallons of distillate product per year. The Blawnox terminal receives bulk petroleum products, such as low sulfur diesel, kerosene and biodiesel from the distribution pipeline and tanker trucks and stores them in one of the eight Aboveground Storage Tanks (ASTs). Distillate products are transferred from the ASTs to the Truck Loading Rack (TLR) for the loading of tanker trucks. Hydrocarbon vapors are transferred from the tanker trucks through the TLR to the Vapor Combustion Unit (VCU) for destruction.

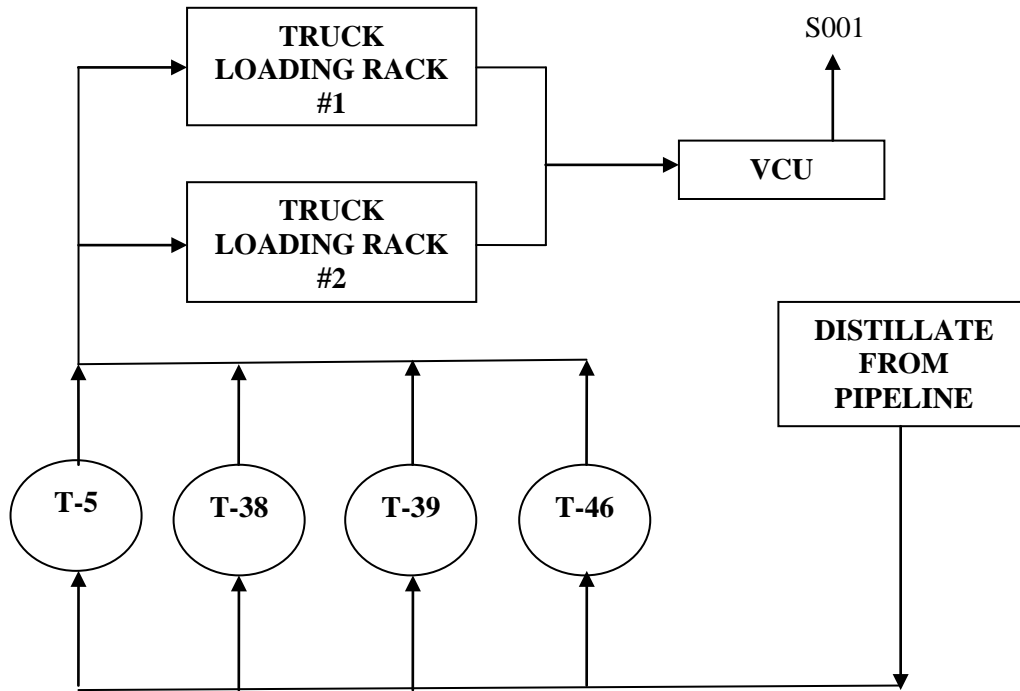

The facility is a synthetic minor source of Volatile Organic Compounds (VOCs) and Hazardous Air Pollutants (HAPs) and is a minor source of Particulate matter (PM), Particulate Matter < 10 microns in diameter (PM-10), Sulfur Dioxide (SO₂), Nitrogen Oxides (NO_x) and Carbon Monoxide (CO) as defined in section 2101.20 of Article XXI.

The emission units regulated by this permit are summarized in Table II-1:

**TABLE II-1
Emission Unit Identification**

I.D.	SOURCE DESCRIPTION	CONTROL DEVICE(S)	MAXIMUM CAPACITY	FUEL/RAW MATERIAL	STACK I.D.
P001	Truck loading rack with two bays and six loading arms	Vapor Combustion Unit	2,400 gpm	Distillate Products	S001
T-05	Aboveground Storage Tank	Internal Floating Roof	525,000	Transmix Products	NA
T-38	Aboveground Storage Tank	Internal Floating Roof	1,260,000	Distillate Products	NA
T-39	Aboveground Storage Tank	Internal Floating Roof	630,000	Distillate Products	NA
T-46	Aboveground Storage Tank	None	630,000	Distillate Products	NA
T-009	Aboveground Storage Tank	Emergency Vents	30,000	Biodiesel	NA
T-010	Aboveground Storage Tank	Emergency Vents	30,000	Biodiesel	NA
T-011	Aboveground Storage Tank	Emergency Vents	30,000	Biodiesel	NA
T-012	Aboveground Storage Tank	Emergency Vents	30,000	Biodiesel	NA

Facility Process Diagram:

DECLARATION OF POLICY

Pollution prevention is recognized as the preferred strategy (over pollution control) for reducing risk to air resources. Accordingly, pollution prevention measures should be integrated into air pollution control programs wherever possible, and the adoption by sources of cost-effective compliance strategies, incorporating pollution prevention, is encouraged. The Department will give expedited consideration to any permit modification request based on pollution prevention principles.

The permittee is subject to the terms and conditions set forth below. These terms and conditions constitute provisions of *Allegheny County Health Department Rules and Regulations, Article XXI Air Pollution Control*. The subject equipment has been conditionally approved for operation. The equipment shall be operated in conformity with the plans, specifications, conditions, and instructions which are part of your application, and may be periodically inspected for compliance by the Department. In the event that the terms and conditions of this permit or the applicable provisions of Article XXI conflict with the application for this permit, these terms and conditions and the applicable provisions of Article XXI shall prevail. Additionally, nothing in this permit relieves the permittee from the obligation to comply with all applicable Federal, State and Local laws and regulations.

III. GENERAL CONDITIONS - Minor Source

1. Prohibition of Air Pollution (§2101.11)

It shall be a violation of this permit to fail to comply with, or to cause or assist in the violation of, any requirement of this permit, or any order or permit issued pursuant to authority granted by Article XXI. The permittee shall not willfully, negligently, or through the failure to provide and operate necessary control equipment or to take necessary precautions, operate any source of air contaminants in such manner that emissions from such source:

- a. Exceed the amounts permitted by this permit or by any order or permit issued pursuant to Article XXI;
- b. Cause an exceedance of the ambient air quality standards established by Article XXI §2101.10;
or
- c. May reasonably be anticipated to endanger the public health, safety, or welfare.

2. Definitions (§2101.20)

- a. Except as specifically provided in this permit, terms used retain the meaning accorded them under the applicable provisions and requirements of Article XXI or the applicable federal or state regulation. Whenever used in this permit, or in any action taken pursuant to this permit, the words and phrases shall have the meanings stated, unless the context clearly indicates otherwise.
- b. Unless specified otherwise in this permit or in the applicable regulation, the term “*year*” shall mean any twelve (12) consecutive months.

3. Conditions (§2102.03.c)

It shall be a violation of this permit giving rise to the remedies provided by Article XXI §2109.02, for any person to fail to comply with any terms or conditions set forth in this permit.

4. Certification (§2102.01)

Any report, or compliance certification submitted under this permit shall contain written certification by a responsible official as to truth, accuracy, and completeness. This certification and any other certification required under this permit shall be signed by a responsible official of the source, and shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

5. Transfers (§2102.03.e)

This permit shall not be transferrable from one person to another, except in accordance with Article XXI §2102.03.e and in cases of change-in-ownership which are documented to the satisfaction of the Department, and shall be valid only for the specific sources and equipment for which this permit was issued. The transfer of permits in the case of change-in-ownership may be made consistent with the administrative permit amendment procedure of Article XXI §2103.14.b The required documentation and fee must be received by the Department at least 30 days before the intended transfer date.

6. Term (§2103.12.e, §2103.13.a)

- a. This permit shall remain valid for five (5) years from the date of issuance, or such other shorter period if required by the Clean Air Act, unless revoked. The terms and conditions of an expired permit shall automatically continue pending issuance of a new operating permit provided the permittee has submitted a timely and complete application and paid applicable fees required under Article XXI Part C, and the Department through no fault of the permittee is unable to issue or deny a new permit before the expiration of the previous permit.
- b. Expiration. Permit expiration terminates the source's right to operate unless a timely and complete renewal application has been submitted consistent with the requirements of Article XXI Part C.

7. Need to Halt or Reduce Activity Not a Defense (§2103.12.f.2)

It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

8. Property Rights (§2103.12.f.4)

This permit does not convey any property rights of any sort, or any exclusive privilege.

9. Duty to Provide Information (§2103.12.f.5)

- a. The permittee shall furnish to the Department in writing within a reasonable time, any information that the Department may request to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the Department copies of any records required to be kept by the permit.
- b. Upon cause shown by the permittee the records, reports, or information, or a particular portion thereof, claimed by the permittee to be confidential shall be submitted to the Department in accordance with the requirements of Article XXI, §2101.07.d.4. Information submitted to the

Department under a claim of confidentiality, shall be available to the US EPA and the PADEP upon request and without restriction. Upon request of the permittee the confidential information may be submitted to the USEPA and PADEP directly. Emission data or any portions of any draft, proposed, or issued permits shall not be considered confidential.

10. Modification of Section 112(b) Pollutants which are VOCs or PM₁₀ (§2103.12.f.7)

Except where precluded under the Clean Air Act or federal regulations promulgated under the Clean Air Act, if this permit limits the emissions of VOCs or PM₁₀ but does not limit the emissions of any hazardous air pollutants, the mixture of hazardous air pollutants which are VOCs or PM₁₀ can be modified so long as no permit emission limitations are violated. A log of all mixtures and changes shall be kept and reported to the Department with the next report required after each change.

11. Right to Access (§2103.12.h.2)

Upon presentation of credentials and other documents as may be required by law, the permittee shall allow authorized Department and other federal, state, county, and local government representatives to:

- a. Enter upon the permittee's premises where a permitted source is located or an emissions-related activity is conducted, or where records are or should be kept under the conditions of the permit;
- b. Have access to, copy and remove, at reasonable times, any records that must be kept under the conditions of the permit;
- c. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and
- d. As authorized by either Article XXI or the Clean Air Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or other applicable requirements.

12. Certification of Compliance (§2103.12.h.5, §2103.22.i.1)

- a. The permittee shall submit on an annual basis, certification of compliance with all terms and conditions contained in this permit, including emission limitations, standards, or work practices. The certification of compliance shall be made consistent with General Condition 4 above and shall include the following information at a minimum:
 - 1) The identification of each term or condition of the permit that is the basis of the certification;
 - 2) The compliance status;
 - 3) Whether any noncompliance was continuous or intermittent;
 - 4) The method(s) used for determining the compliance status of the source, currently and over the reporting period consistent with the provisions of this permit; and
 - 5) Such other facts as the Department may require to determine the compliance status of the source.
- b. All certifications of compliance must be submitted to the Administrator as well as the Department by August 31 of each year for the time period beginning July 1 of the previous year and ending June 30 of the same year. Compliance certifications may be emailed to the Administrator at R3 APD Permits@epa.gov in lieu of mailing a hard copy.

13. Record Keeping Requirements (§2103.12.j.1)

- a. The permittee shall maintain records of required monitoring information that include the following:
 - 1) The date, place as defined in the permit, and time of sampling or measurements;
 - 2) The date(s) analyses were performed;
 - 3) The company or entity that performed the analyses;
 - 4) The analytical techniques or methods used;
 - 5) The results of such analyses; and
 - 6) The operating parameters existing at the time of sampling or measurement.
- b. The permittee shall maintain and make available to the Department, upon request, records including computerized records that may be necessary to comply with the reporting and emission statements in Article XXI §2108.01.e. Such records may include records of production, fuel usage, maintenance of production or pollution control equipment or other information determined by the Department to be necessary for identification and quantification of potential and actual air contaminant emissions.

14. Retention of Records (§2103.12.j.2)

The permittee shall retain records of all required monitoring data and support information for a period of at least five (5) years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit.

15. Reporting Requirements (§2103.12.k)

- a. The permittee shall submit reports of any required monitoring at least every six (6) months. All instances of deviations from permit requirements must be clearly identified in such reports. All required reports must be certified by the Responsible Official.
- b. Prompt reporting of deviations from permit requirements is required, including those attributable to upset conditions as defined in this permit and Article XXI §2108.01.c, the probable cause of such deviations, and any corrective actions or preventive measures taken.
- c. All reports submitted to the Department shall comply with the certification requirements of General Condition III.4 above.
- d. Semiannual reports required by this permit shall be submitted to the Department as follows:
 - 1) One semiannual report is due by July 31 of each year for the time period beginning January 1 and ending June 30.
 - 2) One semiannual report is due by January 31 of each year for the time period beginning July 1 and ending December 31 of the previous year.
 - 3) The first semiannual report shall be due January 31, 2012 for the time period beginning on the issuance date of this permit through December 31, 2011.

16. Severability Requirement (§2103.12.l)

The provisions of this permit are severable, and if any provision of this permit is determined by a court of competent jurisdiction to be invalid or unenforceable, such a determination will not affect the remaining provisions of this permit.

17. Existing Source Reactivations (§2103.13.d)

The permittee shall not reactivate any source that has been out of operation or production for a period of one year or more unless the permittee has submitted a reactivation plan request to, and received a written reactivation plan approval from, the Department. Existing source reactivations shall meet all requirements of Article XXI §2103.13.d.

18. Administrative Permit Amendment Procedures (§2103.14.b, §2103.24.b)

An administrative permit amendment may be made consistent with the procedures of Article XXI §2103.14.b and §2103.24.b. Administrative permit amendments are not authorized for any amendment precluded by the Clean Air Act or the regulations thereunder.

19. Revisions and Minor Permit Modification Procedures (§2103.14.c, §2103.24.a)

Sources may apply for revisions and minor permit modifications on an expedited basis in accordance with Article XXI §2103.14.c and §2103.24.a.

20. Significant Permit Modifications (§2103.14.d)

Significant permit modifications shall meet all requirements of the applicable subparts of Article XXI, Part C, including those for applications, fees, public participation, review by affected States, and review by EPA, as they apply to permit issuance and permit renewal. The approval of a significant permit modification, if the entire permit has been reopened for review, shall commence a new full five (5) year permit term. The Department shall take final action on all such permits within nine (9) months following receipt of a complete application.

21. Duty to Comply (§2103.12.f.1, §2103.22.g)

The permittee shall comply with all permit conditions and all other applicable requirements at all times. Any permit noncompliance constitutes a violation of the Clean Air Act, the Air Pollution Control Act, and Article XXI and is grounds for any and all enforcement action, including, but not limited to, permit termination, revocation and reissuance, or modification, and denial of a permit renewal application.

22. Renewals (§2103.13.b., §2103.23.a)

Renewal of this permit is subject to the same fees and procedural requirements, including those for public participation and affected State and EPA review, that apply to initial permit issuance. The application for renewal shall be submitted at least six (6) months but not more than eighteen (18) months prior to expiration of this permit. The application shall also include submission of a supplemental compliance review as required by Article XXI §2102.01.

23. Reopenings for Cause (§2103.15, §2103.25.a, §2103.12.f.3)

- a. This permit shall be reopened and reissued under any of the following circumstances:
- 1) Additional requirements under the Clean Air Act become applicable to a major source with a remaining permit term of three (3) or more years. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended solely due to the failure of the Department to act on a permit renewal application in a timely fashion.
 - 2) Additional requirements, including excess emissions requirements, become applicable to an affected source under the acid rain program. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into this permit.
 - 3) The Department or EPA determines that this permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of this permit.
 - 4) The Administrator or the Department determines that this permit must be reissued or revoked to assure compliance with the applicable requirements.
- b. This permit may be modified; revoked, reopened, and reissued; or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition. No permit revision shall be required, under any approved economic incentives, marketable permits, emissions trading, and other similar programs or processes, for changes that are provided for in this permit.

24. Reopenings for Cause by the EPA (§2103.25.b)

This permit may be modified, reopened and reissued, revoked or terminated for cause by the EPA in accordance with procedures specified in Article XXI §2103.25.b.

25. Annual Operating Permit Administration Fee (§2103.40)

In each year during the term of this permit, on or before the last day of the month in which the application for this permit was submitted, the permittee shall submit to the Department, in addition to any other applicable administration fees, an Annual Operating Permit Administration Fee in accordance with §2103.40. by check or money order payable to the “Allegheny County Air Pollution Control Fund” in the amount specified in the fee schedule applicable at that time.

26. Other Requirements not Affected (§2104.08, §2105.02)

Compliance with the requirements of this permit shall not in any manner relieve any person from the duty to fully comply with any other applicable Federal, State, or County statute, rule, regulation, or the like, including but not limited to the odor emission standards under Article XXI §2104.04, any applicable NSPSs, NESHAPs, MACTs, or Generally Achievable Control Technology (GACT) standards now or hereafter established by the EPA, and any applicable requirements of BACT or LAER as provided by Article XXI, any condition contained in any applicable Installation or Operating Permit and/or any additional or more stringent requirements contained in an order issued to such person pursuant to Article XXI Part I.

27. Termination of Operation (§2108.01.a)

In the event that operation of any source of air contaminants is permanently terminated, the person responsible for such source shall so report, in writing, to the Department within 60 days of such termination.

28. Emissions Inventory Statements (§2108.01.e & g)

- a. Emissions inventory statements in accordance with Article XXI §2108.01.e shall be submitted to the Department by March 15 of each year for the preceding calendar year. The Department may require more frequent submittals if the Department determines that more frequent submissions are required by the EPA or that analysis of the data on a more frequent basis is necessary to implement the requirements of Article XXI or the Clean Air Act.
- b. The failure to submit any report or update within the time specified, the knowing submission of false information, or the willful failure to submit a complete report shall be a violation of this permit giving rise to the remedies provided by Article XXI §2109.02.

29. Tests by the Department (§2108.02.d)

Notwithstanding any tests conducted pursuant to Article XXI §2108.02, the Department or another entity designated by the Department may conduct emissions testing on any source or air pollution control equipment. At the request of the Department, the person responsible for such source or equipment shall provide adequate sampling ports, safe sampling platforms and adequate utilities for the performance of such tests.

30. Other Rights and Remedies Preserved (§2109.02.b)

Nothing in this permit shall be construed as impairing any right or remedy now existing or hereafter created in equity, common law or statutory law with respect to air pollution, nor shall any court be deprived of such jurisdiction for the reason that such air pollution constitutes a violation of this permit.

31. Enforcement and Emergency Orders (§2109.03, §2109.05)

- a. The person responsible for this source shall be subject to any and all enforcement and emergency orders issued to it by the Department in accordance with Article XXI §2109.03, §2109.04 and §2109.05.
- b. Upon request, any person aggrieved by an Enforcement Order or Emergency Order shall be granted a hearing as provided by Article XXI §2109.03.d; provided however, that an Emergency Order shall continue in full force and effect notwithstanding the pendency of any such appeal.
- c. Failure to comply with an Enforcement Order or immediately comply with an Emergency Order shall be a violation of this permit thus giving rise to the remedies provided by Article XXI §2109.02.

32. Penalties, Fines, and Interest (§2109.07.a)

A source that fails to pay any fee required under this permit when due shall pay a civil penalty of 50% of the fee amount, plus interest on the fee amount computed in accordance with Article XXI §2109.06.a.4

from the date the fee was required to be paid. In addition, the source may have this permit revoked for failure to pay any fee required.

33. Appeals (§2109.10)

In accordance with State Law and County regulations and ordinances, any person aggrieved by an order or other final action of the Department issued pursuant to Article XXI or any unsuccessful petitioner to the Administrator under Article XXI Part C, Subpart 2, shall have the right to appeal the action to the Director in accordance with the applicable County regulations and ordinances.

34. Risk Management (§2104.08, 40 CFR Part 68)

This source, as defined in 40 CFR Part 68.3, is subject to Part 68. This stationary source shall submit a risk management plan (RMP) by the date specified in Part 68.10. This stationary source shall certify compliance with the requirements of Part 68 as part of the annual compliance certification as required by *General Condition III.12 above*.

35. Circumvention (§2101.14)

For purposes of determining compliance with the provisions of this permit and Article XXI, no credit shall be given to any person for any device or technique, including but not limited to the operation of any source with unnecessary amounts of air, the combining of separate sources except as specifically permitted by Article XXI and the Department, the use of stacks exceeding Good Engineering Practice height as defined by regulations promulgated by the US EPA at 40 CFR §§51.100 and 51.110 and Subpart I, and other dispersion techniques, which without reducing the amount of air contaminants emitted, conceals or dilutes an emission of air contaminants which would otherwise violate the provisions of this Article; except that, for purposes of determining compliance with Article §2104.04 concerning odors, credit for such devices or techniques, except for the use of a masking agent, may be given.

36. Duty to Supplement and Correct Relevant Facts (§2103.12.d.2)

- a. The permittee shall provide additional information as necessary to address requirements that become applicable to the source after the date it files a complete application but prior to the Department taking action on the permit application.
- b. The permittee shall provide supplementary fact or corrected information upon becoming aware that incorrect information has been submitted or relevant facts were not submitted.
- c. Except as otherwise required by this permit and Article XXI, the Clean Air Act, or the regulations thereunder, the permittee shall submit additional information as necessary to address changes occurring at the source after the date it files a complete application but prior to the Department taking action on the permit application.
- d. The applicant shall submit information requested by the Department which is reasonably necessary to evaluate the permit application.

37. Effect (§2102.03.g.)

Except as specifically otherwise provided under Article XXI, Part C, issuance of a permit pursuant to Article XXI Part B or Part C shall not in any manner relieve any person of the duty to fully comply with

the requirements of this permit, Article XXI or any other provision of law, nor shall it in any manner preclude or affect the right of the Department to initiate any enforcement action whatsoever for violations of this permit or Article XXI, whether occurring before or after the issuance of such permit. Further, except as specifically otherwise provided under Article XXI Part C the issuance of a permit shall not be a defense to any nuisance action, nor shall such permit be construed as a certificate of compliance with the requirements of this permit or Article XXI.

38. Installation Permits (§2102.04.a.1.)

It shall be a violation of this permit giving rise to the remedies set forth in Article XXI Part I for any person to install, modify, replace, reconstruct, or reactivate any source or air pollution control equipment which would require an installation permit or permit modification in accordance with Article XXI Part B or Part C.

IV. SITE LEVEL TERMS AND CONDITIONS

1. Reporting of Upset Conditions (§2103.12.k.2)

The permittee shall promptly report all deviations from permit requirements, including those attributable to upset conditions as defined in Article XXI §2108.01.c, the probable cause of such deviations, and any corrective actions or preventive measures taken.

2. Visible Emissions (§2104.01.a)

Except as provided for by Article XXI §2108.01.d pertaining to a cold start, no person shall operate, or allow to be operated, any source in such manner that the opacity of visible emissions from a flue or process fugitive emissions from such source, excluding uncombined water:

- a. Equal or exceed an opacity of 20% for a period or periods aggregating more than three (3) minutes in any sixty (60) minute period; or,
- b. Equal or exceed an opacity of 60% at any time.

3. Odor Emissions (§2104.04) (County-only enforceable)

No person shall operate, or allow to be operated, any source in such manner that emissions of malodorous matter from such source are perceptible beyond the property line.

4. Materials Handling (§2104.05)

The permittee shall not conduct, or allow to be conducted, any materials handling operation in such manner that emissions from such operation are visible at or beyond the property line.

5. Operation and Maintenance (§2105.03)

All air pollution control equipment required by this permit or any order under Article XXI, and all equivalent compliance techniques approved by the Department, shall be properly installed, maintained, and operated consistently with good air pollution control practice.

6. Open Burning (§2105.50)

No person shall conduct, or allow to be conducted, the open burning of any material, except where the Department has issued an Open Burning Permit to such person in accordance with Article XXI §2105.50 or where the open burning is conducted solely for the purpose of non-commercial preparation of food for human consumption, recreation, light, ornament, or provision of warmth for outside workers, and in a manner which contributes a negligible amount of air contaminants.

7. Shutdown of Control Equipment (§2108.01.b)

- a. In the event any air pollution control equipment is shut down for reasons other than a breakdown, the person responsible for such equipment shall report, in writing, to the Department the intent to shut down such equipment at least 24 hours prior to the planned shutdown. Notwithstanding the submission of such report, the equipment shall not be shut down until the approval of the Department is obtained; provided, however, that no such report shall be required

if the source(s) served by such air pollution control equipment is also shut down at all times that such equipment is shut down.

- b. The Department shall act on all requested shutdowns as promptly as possible. If the Department does not take action on such requests within ten (10) calendar days of receipt of the notice, the request shall be deemed denied, and upon request, the owner or operator of the affected source shall have a right to appeal in accordance with the provisions of Article XI.
- c. The prior report required by Site Level Condition IV.7.a above shall include:
 - 1) Identification of the specific equipment to be shut down, its location and permit number (if permitted), together with an identification of the source(s) affected;
 - 2) The reasons for the shutdown;
 - 3) The expected length of time that the equipment will be out of service;
 - 4) Identification of the nature and quantity of emissions likely to occur during the shutdown;
 - 5) Measures, including extra labor and equipment, which will be taken to minimize the length of the shutdown, the amount of air contaminants emitted, or the ambient effects of the emissions;
 - 6) Measures which will be taken to shut down or curtail the affected source(s) or the reasons why it is impossible or impracticable to shut down or curtail the affected source(s) during the shutdown; and
 - 7) Such other information as may be required by the Department.

8. Breakdowns (§2108.01.c)

- a. In the event that any air pollution control equipment, process equipment, or other source of air contaminants breaks down in such manner as to have a substantial likelihood of causing the emission of air contaminants in violation of this permit, or of causing the emission into the open air of potentially toxic or hazardous materials, the person responsible for such equipment or source shall immediately, but in no event later than sixty (60) minutes after the commencement of the breakdown, notify the Department of such breakdown and shall, as expeditiously as possible but in no event later than seven (7) days after the original notification, provide written notice to the Department.
- b. To the maximum extent possible, all oral and written notices required shall include all pertinent facts, including:
 - 1) Identification of the specific equipment which has broken down, its location and permit number (if permitted), together with an identification of all related devices, equipment, and other sources which will be affected.
 - 2) The nature and probable cause of the breakdown.
 - 3) The expected length of time that the equipment will be inoperable or that the emissions will continue.
 - 4) Identification of the specific material(s) which are being, or are likely to be emitted, together with a statement concerning its toxic qualities, including its qualities as an irritant, and its potential for causing illness, disability, or mortality.
 - 5) The estimated quantity of each material being or likely to be emitted.
 - 6) Measures, including extra labor and equipment, taken or to be taken to minimize the length of the breakdown, the amount of air contaminants emitted, or the ambient effects of the emissions, together with an implementation schedule.

- 7) Measures being taken to shut down or curtail the affected source(s) or the reasons why it is impossible or impractical to shut down the source(s), or any part thereof, during the breakdown.
- c. Notices required shall be updated, in writing, as needed to advise the Department of changes in the information contained therein. In addition, any changes concerning potentially toxic or hazardous emissions shall be reported immediately. All additional information requested by the Department shall be submitted as expeditiously as practicable.
- d. Unless otherwise directed by the Department, the Department shall be notified whenever the condition causing the breakdown is corrected or the equipment or other source is placed back in operation by no later than 9:00 AM on the next County business day. Within seven (7) days thereafter, written notice shall be submitted pursuant to Paragraphs a and b above.
- e. Breakdown reporting shall not apply to breakdowns of air pollution control equipment which occur during the initial startup of said equipment, provided that emissions resulting from the breakdown are of the same nature and quantity as the emissions occurring prior to startup of the air pollution control equipment.
- f. In no case shall the reporting of a breakdown prevent prosecution for any violation of this permit or Article XXI.

9. Cold Start (§2108.01.d)

In the event of a cold start on any fuel-burning or combustion equipment, except stationary internal combustion engines and combustion turbines used by utilities to meet peak load demands, the person responsible for such equipment shall report in writing to the Department the intent to perform such cold start at least 24 hours prior to the planned cold start. Such report shall identify the equipment and fuel(s) involved and shall include the expected time and duration of the startup. Upon written application from the person responsible for fuel-burning or combustion equipment which is routinely used to meet peak load demands and which is shown by experience not to be excessively emissive during a cold start, the Department may waive these requirements and may instead require periodic reports listing all cold starts which occurred during the report period. The Department shall make such waiver in writing, specifying such terms and conditions as are appropriate to achieve the purposes of Article XXI. Such waiver may be terminated by the Department at any time by written notice to the applicant.

10. Monitoring of Malodorous Matter Beyond Facility Boundaries (§2104.04)

The permittee shall take all reasonable action as may be necessary to prevent malodorous matter from becoming perceptible beyond facility boundaries. Further, the permittee shall perform such observations as may be deemed necessary along facility boundaries to insure that malodorous matter beyond the facility boundary in accordance with Article XXI §2107.13 is not perceptible and record all findings and corrective action measures taken.

11. Orders (§2108.01.f)

In addition to meeting the requirements of General Condition III.27 and Site Level Conditions IV.7 through IV.10 above, inclusive, the person responsible for any source shall, upon order by the Department, report to the Department such information as the Department may require in order to assess

the actual and potential contribution of the source to air quality. The order shall specify a reasonable time in which to make such a report.

12. Violations (§2108.01.g)

The failure to submit any report or update thereof required by General Condition III.27 and Site Level Conditions IV.7 through IV.11 above, inclusive, within the time specified, the knowing submission of false information, or the willful failure to submit a complete report shall be a violation of this permit giving rise to the remedies provided by Article XXI §2109.02.

13. Emissions Testing (§2108.02)

- a. On or before December 31, 1981, and at two-year intervals thereafter, any person who operates, or allows to be operated, any piece of equipment or process which has an allowable emission rate, of 100 or more tons per year of particulate matter, sulfur oxides or volatile organic compounds shall conduct, or cause to be conducted, for such equipment or process such emissions tests as are necessary to demonstrate compliance with the applicable emission limitation(s) of this permit and shall submit the results of such tests to the Department in writing. Emissions testing conducted pursuant to this section shall comply with all applicable requirements of Article XXI §2108.02.e.
- b. **Orders.** In addition to meeting the requirements of Site Level Condition IV.13.a above, the person responsible for any source shall, upon order by the Department, conduct, or cause to be conducted, such emissions tests as specified by the Department within such reasonable time as is specified by the Department. Test results shall be submitted in writing to the Department within 20 days after completion of the tests, unless a different period is specified in the Department's order. Emissions testing shall comply with all applicable requirements of Article XXI §2108.02.e.
- c. **Tests by the Department.** Notwithstanding any tests conducted pursuant to Site Level Conditions IV.13.a and IV.13.b above, the Department or another entity designated by the Department may conduct emissions testing on any source or air pollution control equipment. At the request of the Department, the person responsible for such source or equipment shall provide adequate sampling ports, safe sampling platforms and adequate utilities for the performance of such tests.
- d. **Testing Requirements.** No later than 45 days prior to conducting any tests required by this permit, the person responsible for the affected source shall submit for the Department's approval a written test protocol explaining the intended testing plan, including any deviations from standard testing procedures, the proposed operating conditions of the source during the test, calibration data for specific test equipment and a demonstration that the tests will be conducted under the direct supervision of persons qualified by training and experience satisfactory to the Department to conduct such tests. In addition, at least 30 days prior to conducting such tests, the person responsible shall notify the Department in writing of the time(s) and date(s) on which the tests will be conducted and shall allow Department personnel to observe such tests, record data, provide pre-weighed filters, analyze samples in a County laboratory and to take samples for independent analysis. Test results shall be comprehensively and accurately reported in the units of measurement specified by the applicable emission limitations of this permit.

- e. Test methods and procedures shall conform to the applicable reference method set forth in this permit or Article XXI Part G, or where those methods are not applicable, to an alternative sampling and testing procedure approved by the Department consistent with Article XXI §2108.02.e.2.
- f. **Violations.** The failure to perform tests as required by this permit or an order of the Department, the failure to submit test results within the time specified, the knowing submission of false information, the willful failure to submit complete results, or the refusal to allow the Department, upon presentation of a search warrant, to conduct tests, shall be a violation of this permit giving rise to the remedies provided by Article XXI §2109.02.

14. Abrasive Blasting (§2105.51)

- a. Except where such blasting is a part of a process requiring an operating permit, no person shall conduct or allow to be conducted, abrasive blasting or power tool cleaning of any surface, structure, or part thereof, which has a total area greater than 1,000 square feet unless such abrasive blasting complies with all applicable requirements of Article XXI §2105.51.
- b. In addition to complying with all applicable provisions of §2105.51, no person shall conduct, or allow to be conducted, abrasive blasting of any surface unless such abrasive blasting also complies with all other applicable requirements of Article XXI unless such requirements are specifically addressed by §2105.51.

15. Asbestos Abatement (§2105.62, §2105.63)

In the event of removal, encasement, or encapsulation of Asbestos-Containing Material (ACM) at a facility or in the event of the demolition of any facility, the permittee shall comply with all applicable provisions of Article XXI §2105.62 and §2105.63.

16. Protection of Stratospheric Ozone (40 CFR Part 82)

- a. Permittee shall comply with the standards for labeling of products using ozone-depleting substances pursuant to 40 CFR Part 82, Subpart E:
 - 1) All containers in which a Class I or Class II substance is stored or transported, all products containing a Class I substance, and all products directly manufactured with a process that uses a Class I substance must bear the required warning statement if it is being introduced into interstate commerce pursuant to §82.106;
 - 2) The placement of the required warning statement must comply with the requirements pursuant to §82.108;
 - 3) The form of the label bearing the required warning statement must comply with the requirements pursuant to §82.110; and
 - 4) No person may modify, remove or interfere with the required warning statement except as described in §82.112.
- b. Permittee shall comply with the standards for recycling and emissions reduction pursuant to 40 CFR Part 82, Subpart F:
 - 1) Persons opening appliances for maintenance, service, repair or disposal must comply with the prohibitions and required practices pursuant to §82.154 and §82.156;

- 2) Equipment used during the maintenance, service, repair or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to §82.158;
 - 3) Persons maintaining, servicing, repairing or disposing of appliances, must be certified by an approved technician certification program pursuant to §82.161;
 - 4) Persons maintaining, servicing, repairing or disposing of appliances must certify to the Administrator of the U.S. Environmental Protection Agency pursuant to §82.162;
 - 5) Persons disposing of small appliances, motor vehicle air conditioners (MVAC) and MVAC-like appliances, must comply with the record keeping requirements pursuant to §82.166;
 - 6) Owners of commercial or industrial process refrigeration equipment must comply with the leak repair requirements pursuant to §82.156; and
 - 7) Owners or operators of appliances normally containing 50 or more pounds of refrigerant must keep records of refrigerant purchased and added to such appliances pursuant to §82.166.
- c. If the permittee manufactures, transforms, destroys, imports or exports a Class I or Class II substance, the Permittee is subject to all the requirements as specified in 40 CFR Part 82, Subpart A (Production and Consumption Controls).
 - d. If the permittee performs a service on a motor vehicle that involves an ozone-depleting substance, refrigerant or regulated substitute substance in the MVAC, the Permittee is subject to all the applicable requirements as specified in 40 CFR Part 82, Subpart B (Servicing of Motor Vehicle Air Conditioners).
 - e. The permittee may switch from any ozone-depleting substance to any alternative that is listed as acceptable in the Significant New Alternatives Policy (SNAP) program promulgated pursuant to 40 CFR Part 82, Subpart G.

17. Volatile Organic Compound Storage Tanks (§2105.12.a)

No person shall place or store, or allow to be placed or stored, a volatile organic compound having a vapor pressure of 1.5 psia or greater under actual storage conditions in any aboveground stationary storage tank having a capacity equal to or greater than 2,000 gallons but less than or equal to 40,000 gallons, unless there is in operation on such tank pressure relief valves which are set to release at the higher of 0.7 psig of pressure or 0.3 psig of vacuum or at the highest possible pressure and vacuum in accordance with State or local fire codes, National Fire Prevention Association guidelines, or other national consensus standard approved in writing by the Department. Petroleum liquid storage vessels that are used to store produced crude oil and condensate prior to lease custody transfer are exempt from these requirements.

18. Fugitive Emissions (§2105.49)

The person responsible for a source of fugitive emissions, in addition to complying with all other applicable provisions of this permit shall take all reasonable actions to prevent fugitive air contaminants from becoming airborne. Such actions may include, but are not limited to:

- a. The use of asphalt, oil, water, or suitable chemicals for dust control;
- b. The paving and maintenance of roadways, parking lots and the like;
- c. The prompt removal of earth or other material which has been deposited by leaks from transport, erosion or other means;
- d. The adoption of work or other practices to minimize emissions;

- e. Enclosure of the source; and
- f. The proper hooding, venting, and collection of fugitive emissions.

19. Episode Plans (§2106.02)

The permittee shall upon written request of the Department, submit a source curtailment plan, consistent with good industrial practice and safe operating procedures, designed to reduce emissions of air contaminants during air pollution episodes. Such plans shall meet the requirements of Article XXI §2106.02.

20. New Source Performance Standards (§2105.05)

- a. It shall be a violation of this permit giving rise to the remedies provided by §2109.02 of Article XXI for any person to operate, or allow to be operated, any source in a manner that does not comply with all requirements of any applicable NSPS now or hereafter established by the EPA, except if such person has obtained from EPA a waiver pursuant to Section 111 or Section 129 of the Clean Air Act or is otherwise lawfully temporarily relieved of the duty to comply with such requirements.
- b. Any person who operates, or allows to be operated, any source subject to any NSPS shall conduct, or cause to be conducted, such tests, measurements, monitoring and the like as is required by such standard. All notices, reports, test results and the like as are required by such standard shall be submitted to the Department in the manner and time specified by such standard. All information, data and the like which is required to be maintained by such standard shall be made available to the Department upon request for inspection and copying.

21. Facility-wide Emission Limitations

Emissions to the atmosphere from the facility shall not exceed 9.95 tons of any single HAP, 24.95 tons of any combination of HAPs, and 49.9 tons of VOCs for any twelve (12) consecutive months. (§2103.20.B.4; Installation Permit No. 0011-I002 IV.21, 40 CFR Part 63, Subpart R)

22. Facility-wide Restrictions

The facility shall not load, store or distribute gasoline at any time. (§2103.20.b.4, 40 CFR Part 63, Subpart BBBBBB)

V. EMISSION UNIT LEVEL TERMS AND CONDITIONS

A. Process P001: Distillate Products Tank Truck Loading

Process Description: Distillate products tank truck loading

Facility ID: Loading rack with two bays: #1 and #2

Max. Design Rate: 2,400 gallons/minute, 144,000 gallons/hour

Raw Materials: Distillate products

Control Device: Vapor combustion unit with a temperature controlled, enclosed combustor

As identified above, Process P001 consists of the following number and type of equipment: One loading rack with two bays and six loading arms attached to a vapor combustion unit with a temperature controlled, enclosed combustor.

1. Restrictions:

- a. The permittee shall not operate or allow to be operated the facility tank truck loading racks unless the loading racks, vapor collection system and VCU are properly operated and maintained according to the following specifications, at all times: (§2103.12.a.2.B; §2102.04.b.6, Installation Permit no. 0011-I002 V.A.1.a)
 - 1) The vapor collection and destruction system shall be designed to collect the total organic compound vapors displaced from tank trucks during product loading. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.1.a.1)
 - 2) The emissions to the atmosphere from the vapor collection and destruction system due to the loading of liquid product into tank trucks shall not exceed 35 milligrams of total organic compounds per liter of distillate loaded. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.1.a.2)
- b. The tanker truck loading rate for distillate shall not exceed 2,400 gallons per minute, 144,000 gallons per hour or 246,000,000 gallons per year. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.1.b; §2103.20.b.4)
- c. The permittee shall not operate, or allow to be operated, the loading racks or VCU in distillate service unless there is the presence of a flame in the VCU. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.1.c)
- d. The VCU shall exhibit no visible emissions during combustion. (Installation Permit no. 0011-I002 V.A.1.d)
- e. Emissions from the VCU shall not exceed the following limitations at any time (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.1.e)

Pollutant	mg/l	lbs/hr	tpy ₁
Volatile Organic Compounds	35	42.06	35.93
Hazardous Air Pollutants	NA	13.74	11.74
Nitrogen Oxides	4	4.81	4.11
Carbon Monoxide	10	12.0	10.27

(1)A year is defined as any consecutive 12-month period

2. Testing Requirements:

- a. The permittee shall conduct an emissions test at least once every five years after the most recent test. Such testing shall demonstrate compliance with Conditions IV.21 above, V.A.1.a.2) above, and V.A.1.e above. (§2102.04.b.6, §2105.13.c, Installation Permit no. 0011-I002 V.A.2.b)
- b. The permittee shall conduct the subject testing in accordance with the requirements of Article XXI §2108.02 and §2107.04. In conducting the required performance tests, the permittee shall use as reference methods and procedures the test methods in Appendix A of 40 CFR Part 60 or other methods and procedures as specified in applicable sections of 40 CFR 60, Subpart XX and this permit. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.2.c)
- c. The permittee shall determine compliance with the standard in conditions V.A.1.a.2) and V.A.1.e above as follows: (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.2.e)
 - 1) The performance test shall be 6 hours long during which at least 300,000 liters of distillate or kerosene is loaded. If this is not possible, the test may be continued the same day until 300,000 liters of distillate or kerosene are loaded or the test may be resumed the next day with another complete 6-hour period. In the latter case, the 300,000-liter criterion need not be met. However, as much as possible, testing should be conducted during the 6-hour period in which the highest throughput of distillate normally occurs. (Installation Permit no. 0011-I002 V.A.2.e.1, §2102.04.b.6)
 - 2) The emission rate (E) of total organic compounds shall be computed using the following equation: (Installation Permit no. 0011-I002 V.A.2.e.2, §2102.04.b.6)

$$E = K \sum_{i=1}^n (V_{esi} C_{ei}) / (L10^6)$$

where:

- E = emission rate of total organic compounds, mg/liter of distillate or kerosene loaded.
- V_{esi} = volume of air vapor mixture exhausted at each interval i, scm.
- C_{ei} = concentration of total organic compounds at each interval i, ppm.
- L = total volume of distillate or kerosene loaded, liters.
- n = number of testing intervals.

i = emission testing interval of 5 minutes.

K= density of calibration gas, 1.83×10^6 for propane and 2.41×10^6 for butane, mg/scm.

- 3) The performance test shall be conducted in intervals of 5 minutes. For each interval i, readings from each measurement shall be recorded, and the volume exhausted (V_{esi}) and the corresponding average total organic compounds concentration (C_{ei}) shall be determined. The sampling system response time shall be considered in determining the average total organic compounds concentration corresponding to the volume exhausted. (Installation Permit no. 0011-I002 V.A.2.e.3, §2102.04.b.6)
 - 4) Method 2B shall be used to determine the volume (V_{esi}) air-vapor mixture exhausted at each interval. (Installation Permit no. 0011-I002 V.A.2.e.4, §2102.04.b.6)
 - 5) Method 25A or 25B shall be used for determining the total organic compounds concentration (C_{ei}) at each interval. The calibration gas shall be either propane or butane. The permittee may exclude the methane and ethane content in the exhaust vent by any method (e.g., Method 18) approved by the U.S. EPA and the Department. (Installation Permit no. 0011-I002 V.A.2.e.5, §2102.04.b.6)
 - 6) To determine the volume (L) of distillate or kerosene dispensed during the performance test period at all loading racks whose vapor emissions are controlled by the processing system being tested, terminal records or readings from distillate or kerosene dispensing meters at each loading rack shall be used. (Installation Permit no. 0011-I002 V.A.2.e.6, §2102.04.b.6)
- d. During the performance test, the gauge pressure in the tanker truck being loaded shall be recorded every 5 minutes while a truck is being loaded; the highest instantaneous pressure that occurs during each loading shall also be recorded. Every loading position must be tested at least once during the performance test. (Installation Permit no. 0011-I002 V.A.2.f, §2102.04.b.6)

3. Monitoring Requirements (§2102.04.e):

- a. A UV beam sensor shall be properly operated and maintained to continuously indicate the presence of a flame in the VCU during gasoline vapor or distillate vapor combustion. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.3.a)
- b. Instrumentation shall be provided to measure the VCU combustion stack temperature to within 5°F of actual temperature. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.3.b)
- c. Each calendar month, the vapor collection system, the vapor processing system, and each loading rack handling distillate shall be inspected during the loading of tank trucks for total organic compounds liquid or vapor leaks. For the purposes of this condition, detection methods incorporating sight, sound, or smell are acceptable. Each detection of a leak shall be recorded and the source of the leak repaired within 15 calendar days after it is detected. (Installation Permit no. 0011-I002 V.A.3.c, §2102.04.b.6)
- d. The permittee shall monitor and record the indicators specified in Condition V.A.1.c above, during distillate service, daily. Compliance with Condition V.A.1.d above shall be determined according to the procedures of EPA Method 22. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.3.d)

4. Record Keeping Requirements (§§2103.12.j & k):

- a. A record of each monthly leak inspection required in condition V.A.3.c above, shall be kept on file at the terminal for at least 5 years. Inspection records shall include, as a minimum, the following information: (Installation Permit no. 0011-I002 V.A.4.a, §2102.04.b.6)
 - 1) Date of inspection.
 - 2) Findings (may indicate no leaks discovered; or location, nature, and severity of each leak).
 - 3) Leak determination method.
 - 4) Corrective action (date each leak repaired; reasons for any repair interval in excess of 15 days).
 - 5) Inspector name and signature.
- b. The permittee shall keep records of all replacements or additions of components performed on an existing vapor processing system for at least 5 years. (Installation Permit no. 0011-I002 V.A.4.b, §2102.04.b.6)
- c. The permittee shall keep and maintain the following data for the loading racks and VCU: (Installation Permit no. 0011-I002 V.A.4.c, §2102.04.b.6)
 - 1) Throughput per product per loading rack (daily, monthly totals, 12-month rolling totals);
 - 2) VCU data as specified in conditions V.A.3.a above and V.A.3.b above (continuously, monthly low);
 - 3) Visible emission observations as specified in condition V.A.1.d above (daily, monthly summary)
 - 4) Records of operation, maintenance, inspection, calibration and/or replacement of process or control equipment; and
 - 5) Stack test protocols and reports.
- d. The permittee shall record all instances of non-compliance with the conditions of this permit and corrective action taken to restore compliance, upon occurrence. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.4.d)
- e. All records shall be retained by the facility for at least five (5) years. These records shall be made available to the Department upon request for inspection and/or copying. (Installation Permit no. 0011-I002 V.A.4.e, §2102.04.b.6)

5. Reporting Requirements:

- a. The permittee shall report the following information to the Department within thirty days of the end of each calendar quarter. The reports shall contain all required information for the time period of the report. (Installation Permit no. 0011-I002 V.A.5.a, §2102.04.b.6)
 - 1) Monthly and 12-month data required to be recorded by condition V.A.4.c above;
 - 2) Non-compliance information required to be recorded by condition V.A.4.d above.
- b. Monthly VOC and HAP emission estimates for the facility shall be submitted to the Department upon request. Emissions estimates may be based on storage tank emissions using Tanks 4.0 or other EPA approved methodology, 35 mg/l VCU gasoline emissions, 9 mg/l truck loading gasoline emissions, AP-42 methodology for distillate estimations, AP-42 §5.2.2.1.1 and HAP

estimations based on speciation data supplied by the manufacturer and EPA approved methodology. (§2102.04.b.6, Installation Permit no. 0011-I002 V.A.5.b)

- c. Reporting instances of non-compliance, does not relieve the permittee of the requirement to report breakdowns in accordance with Site Level Condition IV.8 above, if appropriate. (Installation Permit no. 0011-I002 V.A.5.c, §2102.04.b.6)

6. Work Practice Standards:

None except as provided elsewhere.

7. Additional Requirements

None except as provided elsewhere.

B. Storage Tanks: T-05, T-38 and T-39

Process Description: Three aboveground storage tanks not subject to 40 CFR Part 60 Subpart K. Ka or Kb

Facility ID: T-05, T-38 and T-39

Capacities: 525,000 gallons, 1,260,000 gallons and 630,000 gallons

Raw Materials: Distillate & transmix

Control Device: Internal floating roof

As identified above, storage tanks T-05, T-38 and T-39 consists of the following number and type of equipment: Three vertical aboveground storage tanks with internal floating roofs in distillate and transmix service

1. Restrictions:

- a. The permittee shall not place or store, or allow to be placed or stored, a volatile organic compound having a vapor pressure greater than 1.5 psia under actual storage conditions in any stationary tank, reservoir, or other container with a capacity greater than 40,000 gallons, unless such tank, reservoir, or other container is a pressure tank capable of maintaining working pressure sufficient to, at all times, prevent vapor or gas loss to the atmosphere or is equipped with: (§2105.12.b)
 - 1) An internal floating roof, except that this control equipment shall not be permitted if the volatile organic compounds have a vapor pressure of 11.0 psia or greater under actual storage conditions; or
 - 2) A vapor recovery and disposal system reducing uncontrolled emissions of volatile organic compounds by at least 90% by weight. Compliance testing shall be done in accordance with the provisions of §2107.04 of Article XXI.

- b. Tanks T-05, T-38 and T-39 floating roofs shall comply with the following requirements for internal fixed roofs: (§2105.12.c.2)
 - 1) The internal floating roofs shall be fitted with a primary seal and shall comply with all of the following equipment requirements:
 - a) A closure seal, or seals, to close the space between the roof edge and tank wall shall be used.
 - b) There shall be no holes, tears, or other openings in the seal or any seal fabric or materials.
 - c) All openings except stub drains shall be equipped with covers, lids, or seals such that:
 - i) The cover, lid, or seal is in the closed position at all times except when in actual use;
 - ii) Automatic bleeder vents are closed at all times except when the roof is floated off or landed on the roof leg supports; and,
 - iii) Rim vents, if provided, are set to open when the roof is being floated off the roof leg supports or at the manufacturer's recommended setting.

- c. The combined emissions from tanks T-05, T-38 and T-39 shall not exceed the following at any time: (§2102.04b.5)

TABLE V-B-1 Emission Limitations for T-05, T-38 and T-39¹

POLLUTANT	HOURLY EMISSION LIMIT (lb/hr)	ANNUAL EMISSION LIMIT (tons/year)*
Volatile Organic Compounds	N/A	1.78
Hazardous Air Pollutants	N/A	0.50

(1)A year is defined as any consecutive 12-month period.

2. Testing Requirements:

The Department reserves the right to require emissions testing sufficient to assure compliance with the terms and conditions of this permit. Such testing shall be performed in accordance with Site Level Condition IV.13 entitled “Emissions Testing.” (§2103.12.h.1)

3. Monitoring Requirements (§2102.04.e):

The permittee shall perform routine inspections on the internal floating roofs in, T5, T38 and T39 annually in order to ensure compliance with conditions V.B.1.a and V.B.1.b. (§2105.12.f)

4. Record Keeping Requirements (§2103.12.j & k):

- a. The permittee shall keep and maintain the following data for each subject tank: (§2105.12.f.3, §2103.12.h.1, §2103.12.a.2.B)
- 1) Type, amount and period of storage of each volatile organic liquid stored (monthly and 12-month);
 - 2) Maximum true vapor pressure of the each liquid as stored (monthly);
 - 3) Date and reason for each tank roll-over or cleaning (monthly, 12-month)
 - 4) Readily accessible records, showing the dimension of each subject storage vessel and an analysis showing the capacity of each storage vessel. These records shall be kept for the life of the subject tanks; and
 - 5) Results of all inspections performed on the subject tanks.
- b. For tanks T5, T38 and T39 volatile organic compounds whose storage temperature is governed by ambient weather conditions, the vapor pressure under actual storage conditions shall be determined using a temperature which is representative of the average storage temperature for the hottest month of the year in which such storage takes place. (§2105.12.d)
- c. The permittee shall record all instances of non-compliance with the conditions of this permit and corrective action taken to restore compliance, upon occurrence. (§2103.12.h.1)
- d. All records shall be retained by the facility for at least five (5) years. These records shall be made available to the Department upon request for inspection and/or copying. (§2103.12.j.2)

5. Reporting Requirements:

- a. The permittee shall report the following information to the Department within thirty days of the end of each calendar quarter. The reports shall contain all required information for the time period of the report: (§2103.12.h.1)
 - 1) Data required to be recorded by Conditions V.B.4.a.1), V.B.4.a.2) and V.B.4.a.3) above; and
 - 2) Non-compliance information required to be recorded by V.B.4.c above.
- b. Reporting instances of non-compliance in accordance with Condition V.B.5.a above does not relieve the permittee of the requirement to report breakdowns in accordance with Site Level Condition 8, if appropriate. (§2103.12.k.1)
- c. Monthly VOC and HAP emission estimates for the facility shall be submitted to the Department upon request. Emissions estimates shall be based on storage tank emissions using Tanks 4.0 or other EPA approved methodology, 35 mg/l VRU gasoline emissions, 9 mg/l truck loading gasoline emissions, AP-42 methodology for distillate estimations [AP-42 §5.2.2.1.1 and HAP estimations based on speciation data supplied by the manufacturer and EPA approved methodology]. (Installation Permit no. 0011-I002 V.A.5.b, §2103.12.a.2.B)

6. Work Practice Standards:

None except as provided elsewhere.

7. Additional Requirements

None except as provided elsewhere.

C. Storage Tanks: T-46

Process Description: One aboveground storage tank
Facility ID: T-46
Capacities: 630,000 gallons
Raw Materials: Distillate
Control Device: None

As identified above, storage tank T-46 consists of the following number and type of equipment: One vertical aboveground storage tank in distillate service

1. Restrictions:

- a. Only petroleum distillate shall be stored in tank T-46 at any time. (§2103.12.a.2.B)
- b. The permittee shall place or store, or allow to be placed or stored, a volatile organic compound in tank T-46, unless there is in operation on such tank pressure relief valve which is set to release at the higher of 0.7 psig of pressure or 0.3 psig of vacuum or at the highest possible pressure and vacuum in accordance with state or local fire codes, National Fire Prevention Association guidelines, or other national consensus standard approved in writing by the Department (§2103.12.a.2.B, 40 CFR 60.112)
- c. The emissions from tank T-46 shall not exceed the following at any time: (§2102.04b.5)

TABLE V-C-1 Emission Limitations for T-46¹

POLLUTANT	HOURLY EMISSION LIMIT (lb/hr)	ANNUAL EMISSION LIMIT (tons/year)*
Volatile Organic Compounds	NA	0..27
Hazardous Air Pollutants	NA	0..01

(1)A year is defined as any consecutive 12-month period.

2. Testing Requirements:

The Department reserves the right to require emissions testing sufficient to assure compliance with the terms and conditions of this permit. Such testing shall be performed in accordance with Site Level Condition IV.13 entitled “Emissions Testing.” (§2103.12.h.1)

3. Monitoring Requirements:

The permittee shall maintain a record of the petroleum liquid stored, the period of storage, and the maximum true vapor pressure of that liquid during the respective storage period. (§ 60.113(a))

4. Record Keeping Requirements (§2103.12.j & k):

- a. The permittee shall keep and maintain the following data for each subject tank: (§2105.12.f.3, §2103.12.h.1, §2103.12.a.2.B)

- 1) Type, amount and period of storage of each volatile organic liquid stored (monthly and 12-month);
 - 2) Maximum true vapor pressure of the each liquid as stored (monthly);
 - 3) Date and reason for each tank roll-over or cleaning (monthly, 12-month)
 - 4) Readily accessible records, showing the dimension of each subject storage vessel and an analysis showing the capacity of each storage vessel. These records shall be kept for the life of the subject tanks; and
 - 5) Results of all inspections performed on the subject tanks.
- b. For tank T-46 volatile organic compound whose storage temperature is governed by ambient weather conditions, the vapor pressure under actual storage conditions shall be determined using a temperature which is representative of the average storage temperature for the hottest month of the year in which such storage takes place. (§2105.12.d)
 - c. For tank T46 available data on the typical Reid vapor pressure and the maximum expected storage temperature of the stored product may be used to determine the maximum true vapor pressure from nomographs contained in API Bulletin 2517, unless the Administrator or Department specifically requests that the liquid be sampled, the actual storage temperature determined, and the Reid vapor pressure determined from the sample(s). (§ 60.113(b))
 - d. For tank T46 the true vapor pressure of each type of crude oil with a Reid vapor pressure less than 13.8 kPa (2.0 psia) or whose physical properties preclude determination by the recommended method is to be determined from available data and recorded if the estimated true vapor pressure is greater than 6.9 kPa (1.0 psia). (§ 60.113(c))
 - e. The permittee shall record all instances of non-compliance with the conditions of this permit and corrective action taken to restore compliance, upon occurrence. (§2103.12.h.1)
 - f. All records shall be retained by the facility for at least five (5) years. These records shall be made available to the Department upon request for inspection and/or copying. (§2103.12.j.2)

5. Reporting Requirements:

- a. The permittee shall report the following information to the Department within thirty days of the end of each calendar quarter. The reports shall contain all required information for the time period of the report: (§2103.12.h.1)
 - 1) Data required to be recorded by condition V.C.4.a.1), V.C.4.a.2), V.C.4.a.3) above; and
 - 2) Non-compliance information required to be recorded by V.C.4.e above.
- b. Reporting instances of non-compliance in accordance with condition V.C.5.a.2) above does not relieve the permittee of the requirement to report breakdowns in accordance with Site Level Condition IV.8 above, if appropriate. (§2103.12.k.1)
- c. Monthly VOC and HAP emission estimates for the facility shall be submitted to the Department upon request. Emissions estimates shall be based on storage tank emissions using Tanks 4.0 or other EPA approved methodology, 35 mg/l VRU gasoline emissions, 9 mg/l truck loading gasoline emissions, AP-42 methodology for distillate estimations [AP-42 §5.2.2.1.1 and HAP estimations based on speciation data supplied by the manufacturer and EPA approved methodology. (Installation Permit no. 0011-I002 V.A.5.b, §2103.12.a.2.B)

6. Work Practice Standards:

None except as provided elsewhere.

7. Additional Requirements

None except as provided elsewhere.

VI. MISCELLANEOUS

A. Three boilers with maximum capacities of 0.91 MMBtu/hr and 0.70 MMBtu/hr fired with natural gas:

1. Restrictions:

- a. The permittee shall not operate or allow to be operated the two Weil McLain, LCB-8 0.91 MMBtu/hr and one Harsco Industrial Patterson-Kelly, N700 0.7 MMBtu/hr boilers in such a manner that the emissions of particulate matter from the boilers exceeds 0.008 pounds per MMBtu of actual heat input, at any time while combusting natural gas. (§2104.02.a.1)
- b. At no time shall the permittee operate the subject boilers using any fuel other than natural gas (§2103.12.a.2.B)
- c. Natural gas usage for the two Weil McLain, LCB-8 0.91 MMBtu/hr and one Harsco Industrial Patterson-Kelly, N700 0.7 MMBtu/hr boilers shall not exceed 15.0 mmcf, based on a heating value of 1,020 Btu/scf, at any time: (§2103.12.a.2.B)
- d. Except as provided for by Article XXI 2108.01.d pertaining to cold start, the permittee shall not operate, or allow to be operated, the subject units in such a manner that the opacity of visible emissions from any unit exceeds 0% at any time. (§2103.12.a.2.B)

2. Testing Requirements:

The Department reserves the right to require emissions testing sufficient to assure compliance with the terms and conditions of this permit. Such testing shall be performed in accordance with Site Level Condition IV.13 entitled “Emissions Testing.” (§2103.12.h.1)

3. Monitoring Requirements (§2102.04.e):

None except as provided elsewhere.

4. Record keeping:

- a. The permittee shall record and maintain the following records for the subject units: (§2103.12.a.2.B)
 - 1) The amount of natural gas used. (monthly, 12-month)
 - 2) Episodes of non-compliance with conditions of Section VI.A.1 above of this permit and corrective actions taken to restore compliance.
 - 3) All cold start information.
- b. All records shall be kept on a monthly basis and shall be retained by the facility for at least five (5) years. These records shall be made available to the Department upon request for inspection and/or copying.

5. Reporting:

- a. The permittee shall report the monthly records of condition VI.A.4.a above, to the Department

annual basis. This annual report shall be made with the corresponding quarterly report required in sections V.A.5, V.B.5, and V.C.5 above of this permit. (§2103.12.a.2.B)

- b. Reporting instances of non-compliance in accordance with condition VI.A.4.a.2) above, does not relieve the permittee of the requirement to report breakdowns in accordance with Site Level Condition IV.8 above, if appropriate. (§2103.12.a.2.B)
- c. Until terminated by written notice from the Department, the requirement for the permittee to report cold starts 24 hours in advance in accordance with §2108.01.d. is waived for the subject units. (§2108.01.d)

B. Three oil water seperators, one 8,000 gallon at the Centre Avenue tank farm and two 10,000 gallon and 12,000 gallon at the truck loading rack:

Use of the subject oil/water separators shall be limited to runoff from the tank farm and terminal area only.

C. Two horizontal aboveground storage tanks, one 500 gallon, T-008 and one 1,000 gallon, T-109:

1. Restrictions:

- a. Storage tanks T-008 and T-109 shall not store a volatile organic liquid with a vapor pressure, as stored, in excess of 0.5 psia at any time. (§2103.12.a.2.B)
- b. Volatile organic compounds whose storage temperature is governed by ambient weather conditions, the vapor pressure under actual storage conditions shall be determined using a temperature which is representative of the average storage temperature for the hottest month of the year in which such storage takes place. (§2105.12.d)

2. Record keeping:

The permittee shall maintain, for each storage tank, a record of the material stored, the period of storage and the maximum true vapor pressure of the material during the respective storage period for the storage tanks. (§2103.12.a.2.B)

D. Four vertical fixed roof, heated and insulated aboveground storage tanks:

1. Record keeping:

- a. The permittee shall record and maintain the following records for the subject tanks: (§2103.12.a.2.B)
 - 1) The permittee shall maintain a record of the amount of biodiesel blended (daily, monthly and twelve month rolling), operating temperature of the biodiesel tanks (daily) and the activation of the emergency vents (occurrence). (§2103.12.a.2.B)

- b. The permittee shall report the amount of biodiesel blended and activation of the emergency vent (occurrence) to the Department on a quarterly basis. The report shall be made with the corresponding quarterly reports required in sections V.A.5, V.B.5 and V.C.5 of this permit. (§2103.12.a.2.B)

E. Two 20,000 gallon frac tanks:

1. Record keeping:

- a. The permittee shall record and maintain the following records for the subject tanks: (§2103.12.a.2.B)
 - 1) The type and amount of petroleum liquids collected in the frac tanks (occurrence and annual) during routine maintenance operations of the pipeline leading to the terminal. (§2103.12.a.2.B)
- b. The permittee shall report the type and amount of petroleum liquids collected in the frac tanks to the Department on an annual basis. The report shall be made with the corresponding quarterly report required in sections V.A.5, V.B.5, and V.C.5 above of this permit. (§2103.12.a.2.B)

VII. ALTERNATIVE OPERATING SCENARIOS

There are no alternative operating scenarios for this terminal.

VIII. EMISSIONS LIMITATIONS SUMMARY

The combined emissions from the vapor control unit and storage tanks T-05, T-38, T-39 and T-46 shall not exceed the following limitations at any time:

**TABLE VII-1
Emission Limitations**

POLLUTANT	ANNUAL EMISSION LIMIT (tons/year)*
Nitrogen Oxides	4.11
Carbon Monoxide	10.27
Volatile Organic Compounds	49.40
HAPs	15.32

* A year is defined as any consecutive 12-month period.
